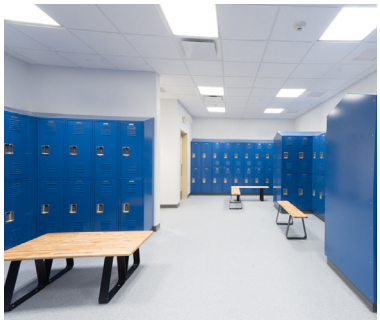
GILL ST. BERNARD'S SCHOOL

Gladstone, NJ

PROJECT TYPE:
Education – Ground Up

ARCHITECT:
USA Architects & Planners

Selected by the prestigious school, Gill St. Bernard's School, Hollister Construction Services managed the construction of their new 14,400sf recreational center and gymnasium. Built within the school's beautiful 208-acre campus in Gladstone, NJ, Gill St. Bernard's new field house opened its doors to athletes and staff in time for the school year, bringing new excitement to the back-to-school season.


Built from a pre-engineered steel structure, the multi-purpose recreational center and gymnasium features bleachers that seat approximately 200 people, a multi-sport practice and game court, new locker rooms with 120 double-height lockers, new bathrooms, and a new fitness and exercise facility. The recreational facility also serves as the main gymnasium for Lower and Middle School students. The project required extensive site-work and landscaping, as well as the installation of all new utility services required to support the new facility.
